Important Notice

Specification apply to die only. Actual performance may degrade when assembled.	Recommended Storage Environment:
does not guarantee device performance after assembly.	Store in original container, in dessicated nitrogen, with no contamination.
All operating parameters must be validated for each customer application by customer's technical experts.	Shelf life for parts stored in above condition is 2 years.
Data sheet information is subjected to change without notice.	If the storage is done in normal atmosphere shelf life is reduced to 6 months.
